

# EU General Data Protection Regulation (GDPR) or PDPA\* – Reference Card

The EU GDPR is effective from 25 May 2018, and it is the culmination of years of work by the EU to reform Data Protection regulation into a Union-wide framework instead of a patchwork of country-specific legislations. The GDPR affects all organizations that hold personal data on EU citizens, regardless of where the organization is based in the world. The maximum fines for non-compliance are the higher of €20m and 4% of the organization's worldwide turnover.

REQUIREMENT	SOPHOS PRODUCT	HOW IT HELPS MEET COMPLIANCE
<b>Stop hacking and malware</b>		
Stop attacks and malicious traffic at your network perimeter	 <b>XG Firewall</b>	Stops advanced malware attacks before they can hit your network and stops attacks from spreading.
